PROFESSIONAL SUMMARY

PGDM candidate with dual specialization in Business Analytics & Marketing. Skilled in SQL, Python (Pandas, NumPy), Power BI (DAX, Dashboards), and Excel for EDA, data cleaning, statistical analysis, and BI reporting. Hands-on experience processing 100K+ record datasets across 3 completed analytics projects and a tech internship. Targeting a Data Analyst role to convert raw data into clear, measurable business decisions through visualization and structured analysis.

TECHNICAL SKILLS

- Data Analysis:** Exploratory Data Analysis (EDA), Data Cleaning, Data Wrangling, Statistical Analysis, ETL, Reporting
- Programming:** Python (Pandas, NumPy), SQL (Joins, Sub-Queries, Aggregations, Window Functions)
- Visualization & BI:** Power BI (DAX, Data Modeling, Interactive Dashboards), Excel (Pivot Tables, VLOOKUP, Charts)
- Marketing Analytics:** Consumer Segmentation, Campaign Performance Analysis, Market Research
- Soft Skills:** Structured Thinking, Data Interpretation, Stakeholder Reporting, Business Communication, Presentation

PROFESSIONAL EXPERIENCE

Data Science Intern — Cognifyz Technologies

Oct 2024 – Nov 2024

Bhopal, India (Remote)

- Processed 50,000+ records using Python, SQL, and Excel to uncover demand trends, performance gaps, and reporting issues across 3 assigned project domains.
- Completed 3 analytics projects covering data cleaning, EDA, visualization, and performance reporting using Excel, Power BI, and SQL within a 2-month internship cycle.
- Developed 3 Power BI dashboards tracking revenue, operations, and performance KPIs, replacing manual Excel reports with interactive drill-down visualizations for faster review.

PROJECTS

Swiggy Food Delivery Analysis

Python | SQL | Power BI | Excel

- Examined 10,000+ customer and restaurant transactions to pinpoint peak order windows, top-selling categories, and 3 high-demand consumer segments by region.
- Segmented customers into 4 spending tiers using Pandas EDA and proposed pricing strategies projected to improve average order value by 10–15%.
- Designed a Power BI dashboard tracking 6 delivery efficiency KPIs; model-based projections indicated a 15–20% potential reduction in operational delays.

Insurance Data Analysis

Python | SQL | Power BI

- Cleaned and structured 100,000+ insurance records using Python (Pandas) and SQL, segmenting policy holders into 5 risk tiers to prioritize claims review and reduce processing time.
- Constructed fraud detection and risk assessment reports using statistical anomaly detection, flagging high-risk claim profiles and structuring findings for underwriting review.
- Visualized insurance risk and claims data in Power BI, converting statistical outputs into executive-friendly dashboards for non-technical stakeholders.

EDUCATION

NIET Business School, Greater Noida — PGDM

Sep 2025 – Present

Dual Specialization: Business Analytics & Marketing

LNCT University, Bhopal — BCA

Aug 2022 – May 2025

CGPA: 7.45/10

CERTIFICATIONS

- Data Analytics & Visualization + Power BI Job Simulation — PwC Forage | Mar 2025 & Aug 2024
- 30-Day SQL Micro Course — Skill Course | Mar 2026
- Microsoft Excel for Data Analysts — Infosys Springboard | Aug 2024
- Career Edge – Young Professional (AI & Soft Skills) — TCS iON | Apr 2025

ACHIEVEMENTS & ACTIVITIES

- AIMA Chanakya National Business Simulation — Team Ranked 6th Ghaziabad Region** — applied quantitative analysis and scenario planning to rank among top 6 teams nationally out of 100+ participating institutes.
- Vice President, Business Analytics Club — NIET Business School; actively participates in analytics workshops, case competitions, and industry seminars.
